

PGZO

Earn money
while sleeping
reaching your goals

Set a goal

i.e: Run 5km every day
for seven consecutive days.

NEXT

Commit an amount

Stake your **crypto** for the period of your defined goal.

[BACK](#)

[NEXT](#)

Achieve your goal and Earn interests

When your goals are reached,
the amount of your staked
assets is unfrozen **with a boost
on your interests.**

What happens if I don't reach my goal?

Set a Goal

What happens if I don't reach my goal?

The purpose of PGZO is to help and to encourage our users to reach their goals while using a "sking in the game" approach so that you can run the extra mile you need to fulfill your goals.

We know, sometimes we fail, and that's okay, what matters is **never give up.**

In case you failed a proposed goal, [your amount in stake for that specific goal](#) remains locked until you reach the same goal twice or it gets automatically unlocked after 30 days.

The "penalty" for a failed goal is simple. You need to wait a superior time to unlock your assets and you lose the boost in your interests proposed to the goal.

As an example, if you set a goal to run 5km for a period of a week with average pace above 8km and you failed, you will need to set a new goal of running 5km for a period of two weeks, so that your amount in staking gets unlocked.

It's important to highlight that your asset remains yours, **ALWAYS!**
